

Kofax TotalAgility 7.0

Information-intensive processes such as filing a claim, applying for a mortgage or admitting a patient can be labor-intensive, slow and error-prone. Kofax TotalAgility 7.0 addresses this First Mile™ challenge of real-time interactions to increase responsiveness and provide a higher level of level of service. You gain a competitive advantage and way to better manage and grow your business.

TotalAgility 7.0 is the world's first unified smart process application development and deployment platform. Smart process applications are a new category of software designed to support business activities that are people intensive, highly variable, loosely structured and subject to frequent change.

The platform combines mobility, information capture, process management, and analytics to create an essential link between your systems of engagement, the way you interact with customers, and the systems of record that run your business. Without the need to modify any existing systems of record, it enables you to achieve a lower total cost of ownership and faster return on investment.

Kofax TotalAgility™ 7.0 dramatically transforms and simplifies the First Mile of real time, information intensive customer interactions.

Kofax TotalAgility 7.0 Features and Benefits

| Feature | Benefit |
|--|--|
| Smart Process Management – orchestration of “predictable” processes & “dynamic case management” workflows | Optimize & automate predictable or highly unpredictable, real time business processes |
| Mobility Services – an all-encompassing mobility concept which allows for unlimited & easy customization across all user capabilities | Reduce process latency & provide customers with the ease of use, quick response times, & empowerment they expect |
| Capture Services* – full multi-channel capture capabilities | Digitize paper for archive & compliance purposes, & provide better access to information |
| Transformation Services – classify, separate, extract, & validate content from structured, semi structured & unstructured documents | Process information faster, more accurately & at a lower cost |
| Business Intelligence & Analytics Services – near real-time analytics of content & process data | Make informed, effective decisions sooner, & gain insight to optimize processes |
| Data Integration Services** – pre-built connectors & web services integration | Minimize the need to create custom integrations or modify systems of record |
| Unified Thin Client Designer & Operator Interfaces – unified interfaces across all services for installation, design, simulation, deployment, operation, administration, monitoring & maintenance | Minimize TCO & achieve faster ROI |
| Multiple Deployment Models – perpetual license on premise, or multi-tenant or dedicated instance hosted SaaS subscription service | Reduce initial deployment costs & speed time-to-market with SaaS subscription service |
| Simplified Pricing & Licensing – simplified, value-based pricing & licensing with most platform capabilities included | Streamlines ordering & licensing process & scales with value received |

* Supported capture sources include TWAIN and ISIS scanners, mobile and tablet devices, MFPs, email, fax, watched folder, and web services.

** TotalAgility 7.0 supports all Kofax Capture™-supported export connectors including IBM/FileNet, EMC Documentum, OpenText, Oracle, Microsoft SharePoint, and third party developed connectors. TotalAgility 7.0 also provides LOB connectors for Microsoft SharePoint, Dynamics CRM, Exchange, Dynamics AX, HP TRIM, and CMIS.

Platform for Smart Process Applications

TotalAgility 7.0 is a platform for developing smart process applications for information-intensive functions such as:

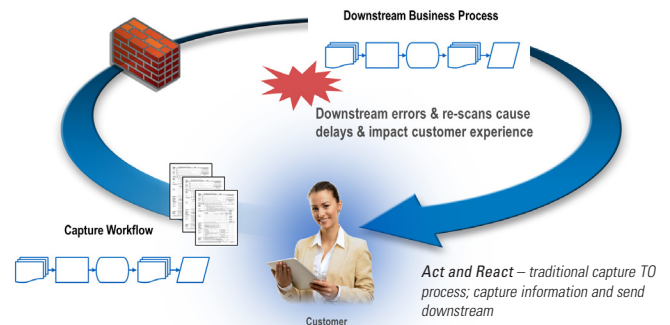

| Industry | Smart Process Applications |
|--------------------|--|
| Financial Services | Customer onboarding or account openings, investment account transfers, mortgage & loan applications, capturing trailing documents |
| Insurance | Customer onboarding or new account applications, new policy quotes, claim submissions, capturing trailing documents |
| Healthcare | New patient onboarding, claim submissions, explanation of benefits, capturing trailing documents |
| Government | Citizen benefit enrollments, claim submissions, license & permit applications & renewals, capturing trailing documents |
| Supply Chain | Accounts payable automation (invoices, purchase requisitions & receiving documents), orders, proof of delivery, waybills & airbills |
| Other Verticals | Construction – stage of completion for loan funding Energy – real time production site reports Telecom – new customer onboarding or account openings |

Platform for Multi-Channel Capture

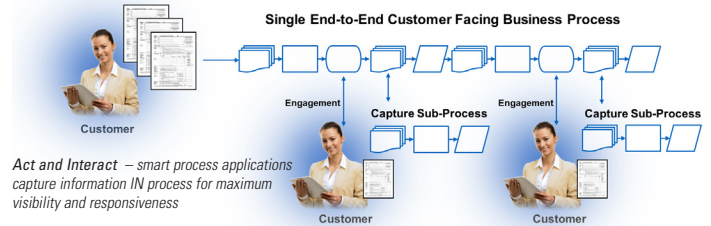

Supporting both centralized batch and transaction-based multi-channel capture at the Point of Origination™ (when and where customer facing interactions actually occur), TotalAgility 7.0 eliminates the need for disparate capture products and sets it apart.

| Other Multi-Channel Capture Products | TotalAgility 7.0 |
|--|---|
| Batch processing based workflow optimized for high volume, centralized/ distributed production level environments (in ad hoc & mobile capture "transactions" each image is treated as a batch) | Batch or transaction processing workflows able to address high volume, centralized/ distributed production level environments, or at the Point of Origination |
| Image & content capture for batch & ad-hoc use cases | Image & content capture for batch, ad-hoc & transactional use cases |
| Capture before or after the process | Capture before, during or after the process |
| Mobile capture is based on Kofax's SDK or standard application, with programming required in either case for customization needs | Mobility includes capture & process management capabilities using HTML5; allows for unlimited & easy forms customization & collaborative capabilities |
| Capture workflow | Capture workflow, & process management with embedded capture, in the same platform |
| Developing & maintaining workflows requires programming, increasing deployment costs | Drag & drop GUI based environment for developing & maintaining workflows, reducing deployment costs |
| Integration with any 3rd party application requires API level programming | Powerful built-in integration with Microsoft & exports to many systems of record |
| Thick clients | Web-based interfaces (thin client) |
| Traditional Client-Server architecture | Contemporary Services Oriented Architecture (SOA) |
| Perpetual license on premise | Perpetual license on premise, or multi-tenant or dedicated instance hosted SaaS subscription service |
| Complex installation, deployment, administration, & maintenance | Centrally installed, deployed, administered, & maintained |
| Pricing & licensing based on individual product components | Simplified, value-based pricing & licensing with most platform capabilities included |
| No or very limited analytics capabilities | TotalAgility Analytics available as an add-on option |

Other Multi-Channel Capture Products

Kofax TotalAgility 7.0

System Requirements

| | |
|--|---|
| Database | SQL Server 2008 (32-bit/64-bit) SQL Server 2012 (32-bit/64-bit) |
| Process Orchestration Server Operating System | Windows 7 (32-bit/64-bit) with SP1 – Thin Client Windows Server 2008 (64-bit) with SP2 – Server Windows Server 2008 R2 (64-bit) – Server Windows 8 (32-bit/64-bit) – Thin Client Windows Server 2012 – Server |
| Transformation Server Operating System | Windows Server 2008 (64-bit***) with SP2 Windows Server 2008 R2 (64-bit***) Windows Server 2012 |
| Transformation Designer Operating System | Windows 7 (32-bit/64-bit) with SP1 Windows Server 2008 (64-bit) with SP2 Windows Server 2008 R2 (64-bit) Windows 8 (32-bit/64-bit) Windows Server 2012 |

*** Note: Windows Server 2008 32-bit is not supported.

About Kofax

Kofax® plc (LSE: KFX) is a leading provider of smart process applications for the business critical First Mile of customer interactions. These begin with an organization's systems of engagement, which generate real time, information intensive communications from customers, and provide an essential connection to their systems of record, which are typically large scale, rigid enterprise applications and repositories not easily adapted to more contemporary technology. Success in the First Mile can dramatically improve an organization's customer experience and greatly reduce operating costs, thus driving increased competitiveness, growth and profitability. Kofax software and solutions provide a rapid return on investment to more than 20,000 customers in banking, insurance, government, healthcare, business process outsourcing and other markets. Kofax delivers these through its own sales and service organization, and a global network of more than 800 authorized partners in more than 75 countries throughout the Americas, EMEA and Asia Pacific.
